Team Hyperboli

Junction 2025

The Problem

$\triangle$

Your CEO wants to use a new SaaS tool.

Your CISO has never heard of it.

Your security team is already underwater.

"Is this safe?" shouldn't take three weeks to answer.
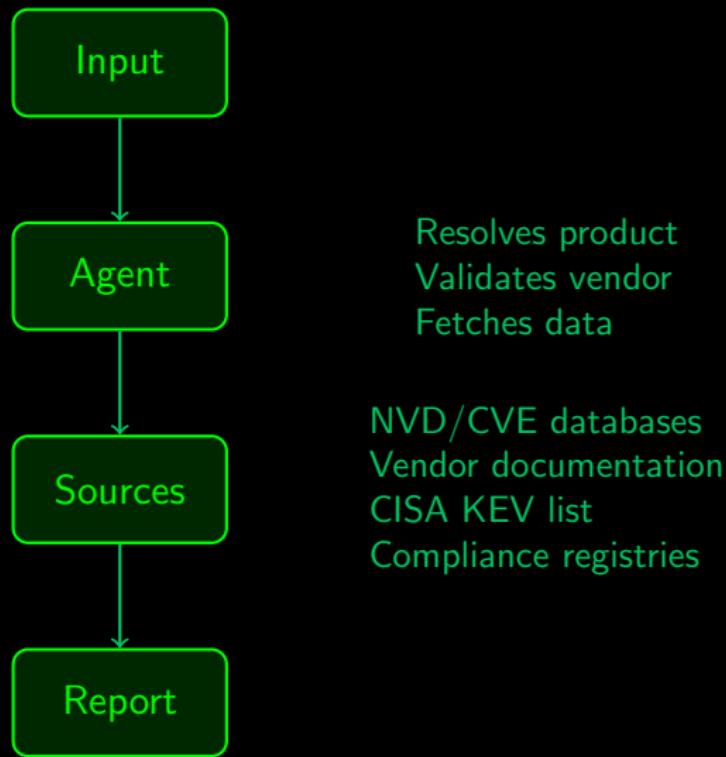

Our Solution

TARKIST.US

Type a product name. Get a security brief.

We analyze 15 security dimensions:

- Known vulnerabilities (CVEs)
- Compliance certifications
- Data handling practices
- Historical breaches

- Admin access controls
- Third-party integrations
- Overall trust score
- Safer alternatives

How It Works

Input

↓

Agent

Resolves product
Validates vendor
Fetches data

↓

Sources

NVD/CVE databases
Vendor documentation
CISA KEV list
Compliance registries

↓

Report

What Makes Us Different

Anti-hallucinations technology

Fast-checker agent

We distinguish vendor marketing from independent evidence.

Actually Usable

Three themes: Light, Dark, and Matrix
Export to PDF for stakeholders
Side-by-side product comparisons

Built for Security Teams

Quantitative trust scores (0-100)
Risk-prioritized recommendations
Evidence trail for compliance

The Numbers

Real data from real assessments

Coverage

15 security dimensions
100+ data sources
Millions of CVE records
Global compliance standards

Speed

3-5 minutes per assessment
Automated source validation
Real-time comparisons

Manual assessment: 2-3 weeks. Tarkist.us: 5 minutes.

Real Use Cases

◇

Sales wants Notion. Is it SOC 2 compliant? What about data residency?

Marketing found a new tool. Any breaches in the last year?

Quarterly vendor review. Compare 10 tools in 50 minutes instead of 10 weeks.

M&A due diligence. Assess their entire stack before the deal closes.

Security should enable business, not block it.

Why This Matters

⇑

Security teams are drowning in requests.

CISOs are making blind trust decisions.

SaaS sprawl is out of control.

We're not replacing security teams.
We're giving them superpowers.

Handle 10x more assessments with the same headcount.
